### SUMMARY

---

I am a fast learner, a risk taker, and I like challenges. Graduated from Eduwork Bootcamp Immersive as a Fullstack Javascript Developer with graduates award. Besides Bootcamp, I also take some online courses that sharpen my hard skills and soft skills.

### WORK EXPERIENCE

---

#### Eduwork

Pontianak

*Programmer Fullstack MERN Intern - Internship*

*Mar 2023 – Mar 2024*

- Had created the JavaScript programming language and used frameworks such as Node.js and Express.js. They were also familiar with databases, both relational like MySQL and non-relational like MongoDB.
- In managing application security, students created authentication techniques using the hashing/bcrypt method. To develop the client side (front-end), they used HTML5, CSS, and JavaScript to create attractive and responsive interfaces. Additionally, students created how to manage the server side (back-end) using tools such as Github, Insomnia, or Postman.
- For the final project, we were required to create a simple website. Be it frontend, backend, or fullstack. We have to be creative ourselves in making this simple website.
- For the backend, database management can be done using relational ones such as MySQL or non-relational ones such as MongoDB. For the frontend, we are free to use styling from CSS, Bootstrap, TailwindCSS, MaterialUI, ChakraUI, Framer, or SASS.

#### BMII ILTIZAM INDONESIA

Kubu Raya

*College Program Intern - Internship*

*Jul 2022 – Aug 2023*

- Assist in the development and implementation of marketing strategies to increase brand awareness and attract new customers.
- Plan and execute marketing campaigns both online and offline, including social media, email marketing, and promotional events.
- Conduct market research to identify trends, customer preferences, and competitor activities.
- Manage relationships with customers and business partners to ensure customer satisfaction and loyalty.

#### Temu Sehat

Pontianak

## **CERTIFICATION & BOOTCAMP**

---

### **Eduwork**

**Pontianak, (Online, ID)**

Programmer Fullstack MERN

*Mar 2023 – Mar 2024*

- At Eduwork, I took the Programmer Fullstack MERN (MongoDB, Express.js, React.js and Node.js) class.
- Students will learn the JavaScript programming language, using platforms such as Node.js (3 months) and using frameworks such as React.js (6 months) and Express.js (4 months).
- Students can use databases, both relational such as MySQL (3 month) and non-relational such as MongoDB (6 month). In managing application security, students also learn authentication techniques using the hashing/bcrypt method.
- Students can organize, store and manage data in database web applications using XAMPP and MySQL relational database management system (RDBMS).
- To develop the client side (front-end), using HTML5, CSS, JavaScript (3 month) and React.js to create attractive and responsive interfaces.
- Students also learn how to manage the server side (back-end) using tools such as Github (1 month), to manage APIs using Insomnia and Postman (1 month).

## **EDUCATION**

---

**University of Tanjungpura**

**Pontianak**

*Bachelor Degree – Islamic Economic*

*Aug 2016 – Des 2023*

GPA 3.41

- Graduate of Tanjungpura University, Islamic Economics Study Program, with a deep understanding of the principles of Islamic economics and its application in the business world. Have work experience as a Marketing Staff at Temu Sehat, where I was involved in marketing strategy development, campaign implementation, market analysis, and marketing content management. I am a creative, proactive, and results-oriented individual, with good communication skills and able to work effectively in a team. Excited to apply my expertise in marketing and Islamic economics to support the growth and success of the company.

Demo : -

### Calculator

*Juli 2024*

Details Creating a simple calculator using JavaScript on a web page involves using HTML for the user interface (UI), CSS for styling, and JavaScript for calculation logic. Below are the steps to create a basic calculator that can handle arithmetic operations such as addition, subtraction, multiplication, and division.

Tools : JavaScript, Html, Css

Demo : [Link Demo Calculator](#)

### Market-Style

*November 2024*

Platform or application that allows sellers and buyers to carry out buying and selling transactions online. In this marketplace project, we will use React.js as a JavaScript framework to build a user interface (frontend), Fake API to provide product data that will be displayed on the platform, as well as several additional features such as login for user authentication and price sum to calculate the total price of the products purchased.

Tools : JavaScript, Reactjs, Tailwind CSS, Html
